

Silo, Parks of Study and Reflection La Reja, July 25, 2010

Ladies and Gentlemen, How are we all?
Seven days have passed.
It's too long.
Seven days.
I came by car, by road...
a boring Sunday.
And a wave started that didn't stop.
Because here, well we see various faces.
And the hundreds and thousands that are moving in various other places?
It's spectacular. Simply, spectacular.
How does it work? I don't know.
But it doesn't matter.
It is something very extraordinary.
Because, what time was it when we got here?
Two thirty? Three?
And there we began to get to the point.
About how it is good to involve people. Logically.
And then suddenly, something was unleashed..
That is, everything was accumulating like a spring.
Of course, if not it wouldn't work. Because it goes....
It spread with impressive speed.
How is that?
Again I'll say, I don't know.
But it's something.
On top of that there were some good friends around who were having all kinds of
operations. It's something.
We hope they are better.
They're better aren't they?
That's good.
But, in no way did we have any idea when the mess would begin.
And while we were into this, the mess began.
Seven days.
It's too many days.
Of course, because the 17th was one thing, and what was done on the 17th was also
done 36 simultaneously in other places because they were doing it also on the 17th.
37 So these similar conditions that day created the conditions for something to be let
loose.
A branch moved and the forest caught fire.
Sure.
Yes, yes, yes.
It's remarkable. It's all very strange.
And with a different aesthetic.
People are enjoying themselves; you don't see long faces.
It's fun. Sure.

Or it promises to be.

By August we should understand what is going to happen.

And what is going to happen is not how this ends... rather how this begins.

This starts in August.

The famous 4th group, and there's the paradox, it's the fourth one even though we didn't have a third one. The famous 4th group starts in August. It starts in August. Now, we will need a small effort to coordinate things among all of us, and it's to inform everyone.

We can't just bypass people and not inform them.

We need to inform everyone about what we are trying to do. If this is going to finish at the end of December, or at the latest at the beginning of January, we will need to do a few things from now until December. At least we need to define 4 or 5 main points and inform everyone... That no one is left... Everyone should know what we are going to take into account in order to level processes and all that, because we are going to level processes among people who have been around a long time and new people.

It's going to be pandemonium.

Like that it's fantastic.

We aren't going to ask someone: "Hey you. How long have you been involved?"

But in order to come to an agreement and make things level, so that our language is more or less uniform, we need to agree on certain milestones, perhaps five milestones.

71 That would be the same as saying perhaps we need five meetings from here to

December. Perhaps we need five meetings and not more. They're offering things...

Perhaps we need these five meetings to come to agreement on how we're going to do the leveling 75 and also to agree on language.

This is one point to address and it's something we need to start developing very soon, in the next days.

Another point is, where are we going to put ourselves?

In some Park. In some place and not in the stratosphere.

We are all going to have to be related to some place.

What a face!

It's about places. 82 We are going to count on not more than 13 such places. 83 We are at that point right now. 84 It could be said that there are other parks almost ready to appear.

Those that are almost ready to appear should appear, but we will go with those that are functioning. You should note that these 13 parks represent lot of human work. A lot. They are not only buildings, they are not only pieces of land, roofs and windows. It's the people who have set everything in motion. It's spectacular. They have an amazing drive. All these people – it would be good if we can reach an agreement with all these people, so we can act simultaneously. Four or five milestones, something, with subjects, where we will level in order to wrap up this thing of the 4th group. Because afterwards we won't have the opportunity; afterwards we will be aiming at large groups.

We won't start after this famous December, We will end now.

It is not that we need to wait for December to set things up.

No, no, we can start setting them up now.

We have become a little bit accelerated, but that's how it is.

And well, what's the big deal? What's one more stripe mean to a tiger.

And we have become accelerated.

We need to see how we can reach agreement among everyone, because while there are several people here what about those elsewhere...? We need to talk with the people. This is not going to be a thing of lists or of being registered or not. There are no lists. What lists!? What's going to count here are the people who are doing things. I'm doing things; I exist. I am not doing things; I don't exist. And the Parks are going to be built starting with those who are doing things and with corresponding vigor and they are going to let loose in every direction. Because this corresponds to the enthusiasm shown by those who are doing things. It is not a matter of some bureaucrat's lists. Lists don't count.

What is necessary is that in the different places we go meeting together with the people who are doing things.

What things? Whatever things they like, but that they are doing things.

No doubt. What's this? 123 It's inspiring. Those are the lists we really need, people who are doing things. And knowing then that you are in a park, and she is in another park and I am in another park. We are located somewhere. And we go for it. Then I believe that with those 13 parks functioning and the people well placed, something will be triggered...

Let's see how the preparation goes from now until the end of the year, because according to this preparation that's how this triggering will be as well and this telepathic thing that has been configured so quickly; that is going to be configured and even more strongly, much stronger... 136 How is it going to be? We do not know but it is going to be much stronger.

Meanwhile all this news will circulate among our people, by telephone, etc. One will call another and the other will respond: "why are you calling me? What news are you going to tell me since I already know it." While all of this is circulating, the same thing is happening among the parks and among countries, the same mess. Negro, right now there are about 400 people connected by streaming video. That's nothing. It doesn't mean anything, because it needs to circulate among many more people. And everyone needs to understand what we are going to do at this time. We have to talk a lot. And we'll probably not lose much by talking a lot about all the things we need to take into account in order to make a uniform sweep and know where we are going to be. And everything's very well. Everything's great. And now, we aren't going to bother anyone anymore. We aren't going to interrupt anymore, we're not going to be directing anything. Now the discussion starts: how are we going to do it, how is it possible, in such a short time, that can't be. All of that. All of that. And may it start to run. Like Mark Antony said on Caesar's death: And now, let the stones roll... and Rome burned. Fantastic!

Good afternoon, may you be very well.
